TO: NGTL System Shippers
FROM: NOVA Gas Transmission Ltd. (NGTL)
RE: NGTL System – New Service(s) for Evolving Electricity Market

The Tolls, Tariff, Facilities & Procedures Committee (TTFP) adopted Issue T2018-01 (Issue) at the January 9, 2018 TTFP meeting for the purpose of entering into discussions about potential new service type(s) for delivery transportation service that address the specific needs of power generators due to the changing wholesale electricity market in Alberta. NGTL will use the TTFP collaborative process to establish a task force to initiate and conduct discussions related to the Issue.

The purpose of this letter is to provide notice to parties that are not TTFP members but have an identifiable interest in this Issue and seek to participate in these discussions. All parties that participate in the task force will be required to adhere to the TTFP procedures during these discussions, including conditions of confidentiality. NGTL anticipates the task force will commence activities in the late February to early-March 2018 timeframe.

If your organization is not a TTFP member but is interested in participating in the task force, or if you have questions about the Issue or task force process, please contact Fraser Mount at (403) 920-2267 or by email at fraser_mount@transcanada.com. Participation is at the discretion of NGTL, and requests must be made on or before March 9, 2018.

Regards,

Patrick M. Keys
Vice-President, Commercial West
Canadian Natural Gas Pipelines
